Academic Projects

Image Captioning: This project repository includes my final year project in which there is an application which provides the caption from an input image.

Institute's Information Interchange and Communication Application(IIICA): This application gives the platform between the Institute and the students to share queries related to subject, to talk with counsellor about stydy and also do complain regarding to the college.

Automatic Plant Irrigation System: This arduino based project used to detect soil moisture & irrigate the soil. By using wifi shield we can automatically or manually turn off & on the pump.
